PROFESSIONAL SUMMARY

UI/UX Designer with 1+ years of experience delivering end-to-end product design across enterprise systems, mobile applications, and responsive web platforms. Proven ability to translate complex, multi-role operational workflows into scalable, accessible interfaces — including a 1000+ screen ICU management ecosystem. Adept at owning the full design lifecycle: research, information architecture, prototyping, design systems, and developer handoff. Seeking to contribute deep product thinking and execution experience to a high-impact design team.

SKILLS

- **Design Tools:** Figma, Adobe XD, Framer, FigJam, Miro, Canva
- **UI/UX Design:** Mobile App Design, Responsive Web Design, Dashboard & Enterprise Workflow Design, Design Systems & Component Libraries, Interaction Design, Information Architecture, Visual Hierarchy
- **UX Research & Strategy:** User Research, Journey Mapping, Wireframing, Prototyping, Usability Testing, Competitive Analysis, Accessibility (WCAG 2.1)
- **Domain Expertise:** Healthcare UX, Enterprise SaaS, Mobile-First UX, eCommerce Design, Developer Collaboration, Brand & Marketing Design

PROFESSIONAL EXPERIENCE

Techify Solutions, Ahmedabad

April 2025 – Present

• Enterprise ICU Management System — Multi-Hospital Healthcare Platform

Led end-to-end UX design for a large-scale ICU ecosystem spanning **1000+ screens** across web, tablet, and mobile. Architected role-based workflows for 6+ user types — admins, doctors, nurses, ICU registrars, and lab technicians — across multi-hospital operations.

- Designed complex clinical workflows covering ICU patient management, tele-consultation, prescriptions, investigations, clinical notes, nursing operations, and medical records. Delivered a structured, accessibility-focused information architecture that reduced workflow friction in high-pressure medical environments.
- Built a scalable design system with reusable components, responsive layout patterns, and documented interaction guidelines to accelerate cross-functional development and maintain consistency across all modules.

• Rural Healthcare Application

Designed a responsive survey platform and companion mobile application for field-level public health data collection covering diabetes and blood pressure monitoring, risk assessment, ANC/PNC tracking, and village-level health campaigns.

- Created mobile-first data collection flows, dashboard analytics, follow-up management, and reporting interfaces optimized for low-tech field workers and healthcare administrators operating in the field.

• Business Contact Scan Application — Product Redesign

Redesigned onboarding, lead management, and contact scanning workflows for a B2B networking application used at trade shows and lead collection events. Simplified navigation structure and improved first-time user experience through modern mobile UX patterns, reducing cognitive load for new users during high-traffic event scenarios.

• Marketing & Brand Design

Produced social media creatives, YouTube banners, campaign assets, and promotional graphics for LinkedIn, Meta, and X maintaining consistent brand identity and visual language across all digital channels.

Freelance UI/UX Designer, Ahmedabad

2022 – 2023

- Designed responsive websites, mobile application interfaces, and branding assets for startups and local businesses across industries including retail, services, and education.
- Independently managed complete design workflows — from client briefing and wireframing to high-fidelity UI delivery — across product design, visual branding, and digital marketing deliverables.

FEATURED UX CASE STUDIES

Pamper Your Pet — End-to-End Pet Care Mobile App

Product Design Case Study

Identified a market gap in fragmented pet-care experiences where appointments, wellness tracking, and grooming services existed across disconnected platforms and designed a unified mobile solution addressing the full pet owner journey.

- Conducted competitive analysis across pet-care and service-booking platforms, identifying key gaps in appointment management, centralized wellness tracking, and emotional engagement in existing products.
- Mapped user journeys and role-based interaction flows for busy pet owners, simplifying appointment scheduling, service discovery, and pet profile management into a single coherent experience.
- Delivered complete mobile UX across onboarding, appointment booking, grooming services, veterinary tracking, loyalty rewards, educational content, and wellness management — spanning the full product lifecycle.

Additional Design Projects

- **9 Wine — Premium Wine Shopping App:** Luxury-inspired mobile eCommerce experience focused on premium product discovery and elevated shopping interactions.
- **Ambrosia Fragrance — Brand Landing Page:** Premium brand-focused landing experience with visual storytelling and high-fidelity UI aesthetics.
- **Additional Work:** ISRO Website Redesign, India Post Redesign, Instagram Clone UI, Stock Management System, and responsive web experiences with frontend-aware UI workflows implementations
